# USG Sheetrock® Brand Mold Tough® AR FIRECODE® Core Panels

### 1. Identification

**product identifier** SHEETROCK® Brand Mold Tough® AR FIRECODE® Core Panels

**Synonym(s)** Gypsum Panels, Drywall, Plasterboard, Wallboard

Recommended use Interior use.

**Recommended restrictions**Use in accordance with manufacturer's recommendations.

Manufacturer/Importer/Supplier USG Middle East Ltd

**Distributor information/Company name** 7410 (WASIL) Street #23, Cross 76 (Right)

Second Industrial City

Dammam 34326 - 4201, Kingdom of Saudi Arabia Tel: +966 13 812 0995 / Fax: +966 13 812 1029

E-mail: info@usgme.com

Website: https://www.usgboral.com/en\_me/

### 2. Hazard(s) identification

Physical hazardsNot classified.Health hazardsNot classified.OSHA defined hazardsNot classified.

**Label elements** 

Hazard symbolNone.Signal wordNone.Hazard statementNone.

**Precautionary statement** 

PreventionObserve good industrial hygiene practices.ResponseGet medical attention/advice if you feel unwell.

**Storage** Store as indicated in Section 7.

**Disposal** Dispose of in accordance with local regulations.

Hazard(s) not otherwise Not classified.

classified (HNOC)

### 3. Composition/information on ingredients

### **Mixtures**

Chemical name	CAS number	%	
Calcium sulfate dihydrate	13397-24-5	≥ 85	
(alternative CAS 10101-41-4)			
Cellulose	9004-34-6	< 5	
Sodium pyrithione	3811-73-2	< 0.25	

### **Composition comments**

All concentrations are in percent by weight unless ingredient is a gas.

The gypsum used to manufacture these panels contains respirable crystalline silica ranging up to 0.56 percent by weight, depending on source, as indicated by bulk sampling methods. Industrial hygiene laboratory testing using both personal and area sampling measured no detectable respirable crystalline silica when cutting the product by "score and snap," rotary saw, or circular saw. Good work practices which minimize the extent of dust generation should be followed, and actual employee exposure must be determined by workplace industrial hygiene testing.

### 4. First-aid measures

Inhalation Dust irritates the respiratory system, and may cause coughing and difficulties in

breathing. Move injured person into fresh air and keep person calm under

observation. Get medical attention if symptoms persist.

Skin contact Contact with dust: Rinse area with plenty of water. Get medical attention if irritation

develops or persists.

**Eve contact** Dust in the eyes: Do not rub eyes. Flush thoroughly with water. If irritation occurs, get

medical assistance.

Ingestion Rinse mouth. Get medical attention if symptoms occur.

Most important symptoms/effects, Under normal conditions of intended use, this material does not pose a risk to health.

> Dust may irritate throat and respiratory system and cause coughing. Provide general supportive measures and treat symptomatically.

Indication of immediate medical attention and special treatment needed

**General information** 

acute and delayed

Ensure that medical personnel are aware of the material(s) involved.

### 5. Fire-fighting measures

Suitable extinguishing media Unsuitable extinguishing media

Specific hazards arising from

the chemical

Special protective actions for

firefighters

Fire fighting

equipment/instructions

Specific methods

Use fire-extinguishing media appropriate for surrounding materials. Not applicable.

Not a fire hazard.

Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Use standard firefighting procedures and consider the hazards of other involved materials.

Cool material exposed to heat with water spray and remove it if no risk is involved.

### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Methods and materials for containment and cleaning up **Environmental precautions** 

See Section 8 of the SDS for Personal Protective Equipment.

No specific clean-up procedure noted. For waste disposal, see Section 13 of the SDS.

Avoid discharge to drains, sewers, and other water systems.

### 7. Handling and storage

Precautions for safe handling

Use work methods which minimize dust production. Avoid inhalation of dust and contact with skin and eyes. Wear appropriate personal protective equipment. Wash hands after handling. Observe good industrial hygiene practices. When moving board with a forklift or similar equipment, it is essential that the equipment be rated capable of handling the loads. The forks should always be long enough to extend completely through the width of the load. Fork spacing between supports should be one half the length of the panels or base being handled so that a maximum of 1.2 M extends beyond the supports on either end.

**Metal Framing** 

Conditions for safe storage, including any incompatibilities

Follow traditional building practices; such as management of water away from the interior of the structure to avoid the growth of mold, mildew and fungus. Remove any building products suspected of being exposed to sustained moisture and considered conducive to mold growth from the job site. Gypsum panels are very heavy, awkward loads posing the risk of severe back injury. Use proper lifting techniques.

Store in a cool, dry, well-ventilated place. Store away from incompatible materials. Protect product from physical damage. Protect from weather and prevent exposure to sustained moisture. Gypsum Association literature (GA-801-07) recommends storing board flat to avoid damaging edges, warping the board and the potential safety hazards of the board falling over. However, in other situations, storing the board flat may cause a tripping hazard or exceed floor limit loads. If stacking board vertically, leave at least 10 cm from the wall to decrease the risk of falling board and no more than 15 cm to avoid too much lateral weight against the wall.

### 8. Exposure controls/personal protection

Occupational exposure limits
US. OSHA Table Z-1 Limits for Air
Contaminants (29 CFR 1910.1000)

No biological exposure limits noted for the ingredient(s).		
Provide sufficient ventilation for operations causing dust formation. Observe occupa-		
tional exposure limits and minimize the risk of exposure.		
Wear approved safety goggles.		
. For prolonged or		
repeated skin contact use suitable protective gloves.		
Normal work clothing (long sleeved shirts and long pants) is recommended.		
Provide sufficient ventilation for operations causing dust formation. Observe occitional exposure limits and minimize the risk of exposure.  Wear approved safety goggles.  Wear approved safety goggles.  It is a good industrial hygiene practice to minimize skin contact. For prolonged or repeated skin contact use suitable protective gloves.		

### **Respiratory protection**

If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Use a NIOSH/MSHA approved air purifying respirator as needed to control exposure. Consult with respirator manufacturer to determine respirator selection, use, and limitations. Use positive pressure, air-supplied respirator for uncontrolled releases or when air purifying respirator limitations may be exceeded. Follow respirator protection program requirements (OSHA 1910.134 and ANSI Z88.2) for all respirator use. Observe any medical surveillance requirements.

Thermal hazards None.

**General hygiene** Always observe good personal hygiene measures, such as washing after handling the considerations material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Observe any medical surveillance

requirements.

### 9. Physical and chemical properties

**Appearance** Paper faced with gypsum core.

**Physical state** Solid **Form** Panel.

Color Gray to off-white. Odor Low to no odor. **Odor threshold** Not applicable.

рΗ 6 - 8

Melting point/freezing point Not applicable. Initial boiling point and boiling range Not applicable. Flash point Not applicable. **Evaporation rate** Not applicable. Flammability (solid, gas) Not applicable.

Upper/lower flammability or explosive limits

Flammability limit - lower (%) Not applicable. Flammability limit - upper (%) Not applicable. Explosive limit - lower (%) Not applicable. Explosive limit - upper (%) Not applicable. Vapor pressure Not applicable. Vapor density Not applicable.

Relative density 2.32 (Gypsum) (H2O=1) Solubility(ies) 0.26 g/100 g (H2O) Partition coefficient (n-octanol/water) Not applicable. **Auto-ignition temperature** Not applicable. 1450 °C

**Decomposition temperature** 

Viscosity Not applicable.

Other information

**Bulk density**  $833 \, \text{kg/m}^3$ Particle size Varies. VOC (Weight %) 0 %

### 10. Stability and reactivity

Reactivity The product is stable and non reactive under normal conditions of use, storage and

transport.

**Chemical stability** Material is stable under normal conditions. Possibility of hazardous reactions Hazardous polymerization does not occur. Conditions to avoid Contact with incompatible materials.

**USGBoral.com** 

Plasterboard

Ceilings

**Interior Finishes** 

**Metal Framing** 

**Incompatible materials** Strong oxidizing agents.

Hazardous decomposition products Calcium oxides, carbon dioxide, and carbon monoxide.

11. Toxicological information

**Information on likely routes of exposure** Not likely, due to the form of the product.

**Ingestion** Mechanical processing may generate dust. Gypsum dust has an irritant action on

**Inhalation** mucous membranes of the upper respiratory tract and eyes (1).

Under normal conditions of intended use, this material does not pose a skin hazard.

**Skin contact** Gypsum was not found to be a skin irritant (2).

health.

Mechanical processing may generate dust. Direct contact with eyes may cause

**Eye contact** temporary irritation (1).

Under normal conditions of intended use, this material does not pose a risk to

Symptoms related to the physical, chemical and toxicological characteristics

Information on toxicological effects

Acute toxicity Low hazard.

**Skin corrosion/irritation** Gypsum was not found to be a skin irritant.

**Serious eye damage/eye** Gypsum does not cause serious eye damage or irritation.

irritation

**Respiratory or skin sensitization**No data available, but based on results from the skin sensitization study, calcium

sulfate is not expected to be a respiratory sensitizer.

**Skin sensitization** Not a skin sensitizer (2).

Germ cell mutagenicityNo evidence of mutagenic potential exists (3,4,5).CarcinogenicityNo evidence of carcinogenic potential exists (6).Reproductive toxicityNo evidence of reproductive toxicity exists (2).

Specific target organ toxicity -

Reproductive toxicity

**Specific target organ toxicity -** Not toxic to lung tissue (6).

repeated exposure

Aspiration hazard

Due to the physical form of the product it is not an aspiration hazard.

Not toxic to lung tissue.

Further information Pre-existing skin and respiratory conditions including dermatitis, asthma and

chronic lung disease might be aggravated by exposure.

12. Ecological information

**Ecotoxicity** The product components are not classified as environmentally hazardous. However,

this does not exclude the possibility that large or frequent spills can have a harmful

or damaging effect on the environment.

Components Species Test Results

Calcium sulfate dihydrate (alternative CAS 10101-41-4) (CAS 13397-24-5)

Aquatic

Fish LC50 Fathead minnow (Pimephales promelas) > 1970 mg/l, 96 hours

Persistence and degradability

Not applicable for the salt of inorganic compounds. Calcium sulfate dissolves in wa-

ter without undergoing chemical degradation.

**Bioaccumulative potential**Bioaccumulation is not expected.

Mobility in soil Calcium sulfate has a low potential for adsorption to soil. If water is applied, gypsum

dissolves and the calcium and sulfate ions are mobile and penetrate the subsoil (7).

Other adverse effects None expected.

13. Disposal considerations

**Disposal instructions**Dispose in accordance with applicable federal, state, and local regulations. Recycle

responsibly.

### 14. Transport information

#### DOT

Not regulated as a hazardous material by DOT.

#### IATA

Not regulated as a dangerous good.

### **IMDG**

Not regulated as a dangerous good.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

Not applicable. This product is a solid. Therefore, bulk transport is governed by IMS-BC code.
